

## Position Opening: Stable Isotope Ratio Mass Spectrometer Technician

Northwestern University's Department of Earth Planetary Sciences is hiring a technician to oversee a new stable isotope geochemistry facility with two Thermo Electron Delta V isotope ratio mass spectrometers equipped with EA, TC/EA, GC and Gas Bench peripherals. We seek an individual with experience with continuous-flow isotope ratio mass spectrometry. Experience with several of the peripherals is preferable. Responsibilities will include instrument maintenance, facility oversight, user training, fiscal management, and method development. Salary will be commensurate with experience.

Northwestern prides itself on interdisciplinary research as demonstrated by the group's ongoing geochemical, paleoclimatological, environmental and biological research. An interest in participating in a broad range of research studies is essential for the successful job candidate.

Northwestern University is located in Evanston, bordering the city of Chicago and on the shores of Lake Michigan. For more information on the department see [www.earth.northwestern.edu](http://www.earth.northwestern.edu) or on the university see [www.northwestern.edu](http://www.northwestern.edu).

Northwestern is an Affirmative Action/Equal Opportunity Employer. To apply, please send cover letter, CV and names of 3 references to [eps@earth.northwestern.edu](mailto:eps@earth.northwestern.edu), Subject: IRMS Tech. Application review will begin January 31<sup>st</sup>, 2008 and will continue until the position is filled.
