How Silver Became Money

presented by

**Professor
Francis Albarède**

*Inaugural Nemmers
Prize in Earth Sciences
Recipient*

Since the birth of coinage in 7th century BCE, the discovery of natural silver deposits has prompted the rise and fall of empires. New measurements of silver allow us to trace the routes of money through history and help us to answer the million-dollar question: What is money?

Wednesday, October 24, 2018

4:00 – 5:00 p.m. - Lecture (Reception to follow)

White Auditorium, Kellogg Global Hub, 2211 Campus Drive, Evanston

No registration required but sign up is appreciated: <http://bit.ly/silverlecture>
